## **DETAILED ACTION**

### ***Drawings***

1. Figure 2B should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Corrected drawing sheets are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

### ***Specification***

2. The disclosure is objected to because of the following informalities: various pages within the specification have words written in different fonts, for example see page 3, lines 10-11. The examiner suggests the use of the same font throughout the specification.

Appropriate correction is required.

### ***Claim Objections***

3. The specification must conclude with a claim particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention or discovery. See CFR 1.75(a). Correction of the following is required:

Claim 1, line 2, recites “the single-stroke manipulation”. There is insufficient antecedent basis for this limitation.

***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claim 1 is rejected under 112 1<sup>st</sup> paragraph because it is a single means claim, wherein the means recitation does not appear in combination with another recited element of means. See MPEP 2164.08(a).

***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. **Claim 1** is rejected under 35 U.S.C. 102(b) as being anticipated by Deveau, U. S. Patent No. 5233666.

Regarding claim 1, Deveau discloses a fader channel assignment in an audio mixing console (figure 2). Deveau’s disclosure comprises a plurality of channels, which constitutes as audio sources, wherein a master clear switch, which constitutes as a single device, is selected, it

Art Unit: 2644

clears all previously selected channels (col. 3, lines 24-26), which reads on a means for moving between more than two audio sources through a single-stroke manipulation of a single device.

### ***Attachments***

8. Please see the attached Appendix, Sample Amendment Format, and Sample Copy of a Patent. These attachments are examples of the appropriate formats and illustrations of how patent application and its claims should be written, and how to address an Office Action regarding the applicant's patent application in an Amendment.
